Style Guide: RudCo Quote Desk

Status: Approved by Ken, 2026-10-10. This is the design direction, built from RudCo's site and our research. Ken owns it.

What this is: how Quote Desk looks: colors, status colors, type, buttons, layout and logo use. How we talk (voice, words, taglines, microcopy) lives in the brand position.

Palette

Section 1

All values come from RudCo's live site, read on 2026-10-10. The CSS stores colors as HSL custom properties on `:root` in index-A39G_5VS.css. The hex values and every contrast ratio below come from brand_colors.py and surface_contrast.py, not by eye.

Role in Quote Desk	Hex	Source
Navy: sidebar, dark bands, focus moments	`#0f1f3d`	`--brand-navy: 220 60% 15%` in the CSS. The page's `theme-color` meta is `#0a1e3f` (rud-co.com HTML).
Navy, share-image background	`#00091e` to `#092347`	Sampled from og/home.png. It is a gradient.
Gold rule (navy backgrounds only)	`#eea91f`	Sampled from the thin rule in og/home.png. It is not in the CSS. It fails on white (2.03:1), so use it only on navy (8.05:1).
Body text	`#1a212d`	`--foreground: 220 26% 14%`
Page background	`#f3f5f7`	`--secondary: 210 20% 96%`. No pure white anywhere: the site's `--background` is `#ffffff`, and we use its off-white tokens instead.
Cards, table, inputs	`#fafbfc`	One lighter step of the same hue (`210 20% 98.5%`), so cards lift off the page without pure white.
Header background (warm off-white)	`#f7f5f3`	`bg-[hsl(40,20%,96%)]` on the home-page header (site code)
Table stripes, sunk panels	`#f6f7f9`	`--muted: 210 20% 97%`
Dividers	`#e5e7eb`	`--border: 220 13% 91%`

Role in Quote Desk	Hex	Source
Primary actions and links	`#0063e6`	`--primary-hover: 214 100% 45%`. The site's `--primary` (`#006eff`) gives 4.49:1 with white, just under 4.5:1, so we use the hover shade as the resting color (5.35:1).
Secondary text	`#454e5e`	Our shade of `--muted-foreground` (`220 15% 50%`). The site value gives 4.38:1 on white, so we darken it to 8.39:1.

Status colors

Section 2

The site already has status tokens: `--available` (green), `--medium` (amber) and `--unavailable` (gray). We keep those hues and darken the text so each label passes 4.5:1. "No match" uses the site's gray. The site uses gray for unavailable items, and a line RudCo does not carry is that case. Red would read as a fault.

Status	Text	Tint	Text on tint	Text on card (`#fafbfc`)	Based on
Ready	`#126932`	`#e7f9ed`	6.20:1	6.55:1	`--available: 142 71% 45%`
Needs the buyer	`#7f4205`	`#fdf0d8`	6.94:1	7.55:1	`--medium: 38 92% 50%`
No match	`#454e5e`	`#eaecf0`	7.09:1	8.09:1	`--unavailable: 220 15% 50%`

Don't use the site's own solid pairs for status badges. White on `--available` is 2.30:1 and white on `--unavailable` is 4.38:1; both fail. Dark text on solid amber (`#1a212d` on `#f59f0a`) passes at 7.58:1 and is fine for a filled "Needs the buyer" badge. Status must also show as a word, never color alone.

Type, radii, buttons

Section 3

- **Type:** the system sans stack. The site loads no web fonts (no `@font-face` in the CSS) and uses Tailwind's default `ui-sans-serif, system-ui, sans-serif`. Numbers and SKUs can use the site's `font-mono` stack: `ui-monospace, SFMono-Regular, Menlo, Monaco, Consolas`.
- **Weights:** 500 for nav, 600 for the wordmark and labels, 700 for headings (`font-medium` , `font-semibold` , `font-bold` in the site code).
- **Radius:** `--radius: .375rem` (6px). Buttons and inputs use `rounded-md` , which is 4px.
- **Buttons:** the site uses the shadcn button set. Default is blue fill with light text, `h-10 px-4` . Quote Desk uses `#fafbfc` for that text (5.16:1 on `#0063e6`). Outline is a 1px border on the card color. A navy variant appears on "Contact Sales":

`bg-brand-navy` with white text (site code). Quote Desk uses blue fill for Approve and Send, outline for Edit and Export, and navy for nothing else.

How the workspace should look like rud-co.com

Section 4

- **Header:** match the site header. Warm off-white bar (`#f7f5f3`), with a 1px bottom border once the page scrolls. On the left, RudCo's round logo image at 32px, then "RudCo" in 600 weight, with a small gray line under it. On the right, nav links in 14px, weight 500.
- **Logo lockup** (Ken, 2026-10-10): RudCo's round mark at 32 px, then a stack: "RudCo" in 600 weight, and under it "QUOTE DESK" in 11 px, weight 600, tracked 0.08em capitals. The label is `#0063e6` on the warm header (4.92:1) and `#8fb8ff` on the navy sidebar (8.15:1), measured by surface_contrast.py. Options are on the logo workshop.
- **Sidebar:** navy (`#0f1f3d`) with white and light-slate text. This carries the brand color the way the share images do.
- **Gold:** one thin gold rule under the sidebar's product name, echoing the share image. Nowhere else.
- **Body:** `#f3f5f7` page, `#fafbfc` cards and table, `#f6f7f9` stripes, `#e5e7eb` dividers. No pure white. RFQ on the left, quote on the right, as Hirsh has it now.

Logo use

Section 5

- Use RudCo's logo files exactly as the site serves them. The header uses this round mark beside the word "RudCo" set as live text. The footer uses a second mark file.

- Never redraw, recolor, stretch or re-letter the mark or the wordmark. Do not build a Quote Desk logo.
- **Favicon** (Ken, 2026-10-10): RudCo's own favicon file, unchanged: ead1229e….png. The tab title leads with what needs the rep, then the RFQ: "3 lines need the buyer · RFQ-0001". Pages with no status use "Quote Desk".
- The share image's all-caps "RUDCO" wordmark is part of a picture. Do not trace it into the app.
